

Appln. No.: 10/528,928

Amendment to the Specification:

Please amend the paragraph at page 19, lines 7-11, as follows:

Balb/c mice were primed with four different peptides in complete Freund's adjuvant. The first two synthetic peptides comprised the first 5 to 7 human amino acids (AA) at the β -secretase₁₁ cleavage site: EVH₁₁HO-C (human A β 11(6 AA) - Seq Id No.:1) and EVHHOKI-C (human A β 11(8 AA) - Seq Id No.:2). The other two peptides for immunization contained a mouse A β ₁₁ AA sequence; EVRHO-C (mouse A β 11(6 AA) - Seq Id No.:3) and EVRHOKI-C (mouse A β 11(8 AA) - Seq Id No.:4). All the peptides were prepared...
